Professional Summary

Java Full Stack Developer with 3.5+ years of experience building scalable enterprise applications using **Java, Spring Boot, Microservices and React.js**. Skilled in **RESTful API** design, **SQL** database optimization, and cloud-native development on Google Cloud Platform (GCP). **Google Cloud Certified**.

Technical Skills

Languages: Java, SQL, JavaScript, HTML, CSS, Python

Frameworks: Spring Boot, Spring, React.js

Databases: PostgreSQL, MySQL, MongoDB

Technology & Tools: RESTful APIs, Microservices, Google Cloud Platform (GCP), Hibernate, Spring MVC, Spring Data, J2EE, JUnit, Mockito, Maven, Redis, Kafka, Kubernetes, Docker, CI/CD, Git, Agile, Scrum, Distributed Systems, Event-Driven Architecture, Design Patterns, Data Structures & Algorithms

Work Experience

Software Engineer 2 | Rappit | Coimbatore

Jan 2025 – Present

- Designed and developed store operating hours configuration feature using **Java** and **Spring Boot**, enabling daily operating hours configuration, override hours for special dates, and pre-schedule changes to operating hours, **ensuring accurate schedules across 900+ retail stores** and downstream systems.
- Implemented a distribution list feature for calculating and allocating campaign resources across retail stores, **replacing manual calculations and reducing allocation errors by 12%**.
- Improved data synchronization module to handle large-scale bulk records by implementing delta-based filtering and asynchronous task processing via GCP Cloud Tasks, **increasing sync capacity by 10×**.
- Migrated authentication from Google SSO to Azure Active Directory by redesigning login flow and access controls, **aligning with enterprise identity standards and centralizing identity management**.

Software Engineer 1 | Rappit | Coimbatore

Apr 2024 – Dec 2024

- Developed features for an enterprise document management system using **Spring Boot** and **React.js**, including hierarchical folder management, user-to-user document sharing, and bulk data import, **streamlining document handling and collaboration for business teams**.
- Implemented efficient **SQL queries in MySQL** to handle hierarchical (tree-structured) folder data, **improving document fetch performance by 30%**.
- Developed an Excel report generation feature and optimized backend queries to reduce data retrieval latency, ensuring stable report processing for **100,000+ records**.
- Modernized application infrastructure by migrating services within **Google Cloud Platform (GCP)** from App Engine to Cloud Run, **reducing infrastructure costs by 15%**.

Software Engineer | Quinbay | Bangalore

Aug 2022 – Oct 2023

- Built **B2B product management** features using **Core Java, Spring Boot, Microservices** and **React.js** backed by **PostgreSQL, MongoDB**, enabling product operations for **150+ B2B sellers** and **expanding platform revenue**.
- Implemented brand authorization validation to ensure product approvals only for verified sellers, **reducing counterfeit and fake brand listings by 40%**.
- Improved restricted keyword detection in product listings by integrating AI-based responses from the data science team, **reducing false product rejections by 30%** and improving seller onboarding experience.
- Developed a multi-location selling feature enabling sellers to fulfill orders from different areas, allowing customers to select the nearest fulfillment point and **increasing seller profitability by 15%**.

Certifications

- [Google Cloud Certified - Associate Cloud Engineer](#)
- [Programming, Data Structures & Algorithms - NPTEL](#)
- [Computing using Python - NPTEL](#)

Education

Karpagam College Of Engineering

2018 – 2022

Bachelor of Engineering in Computer Science and Engineering

CGPA: 8.7
